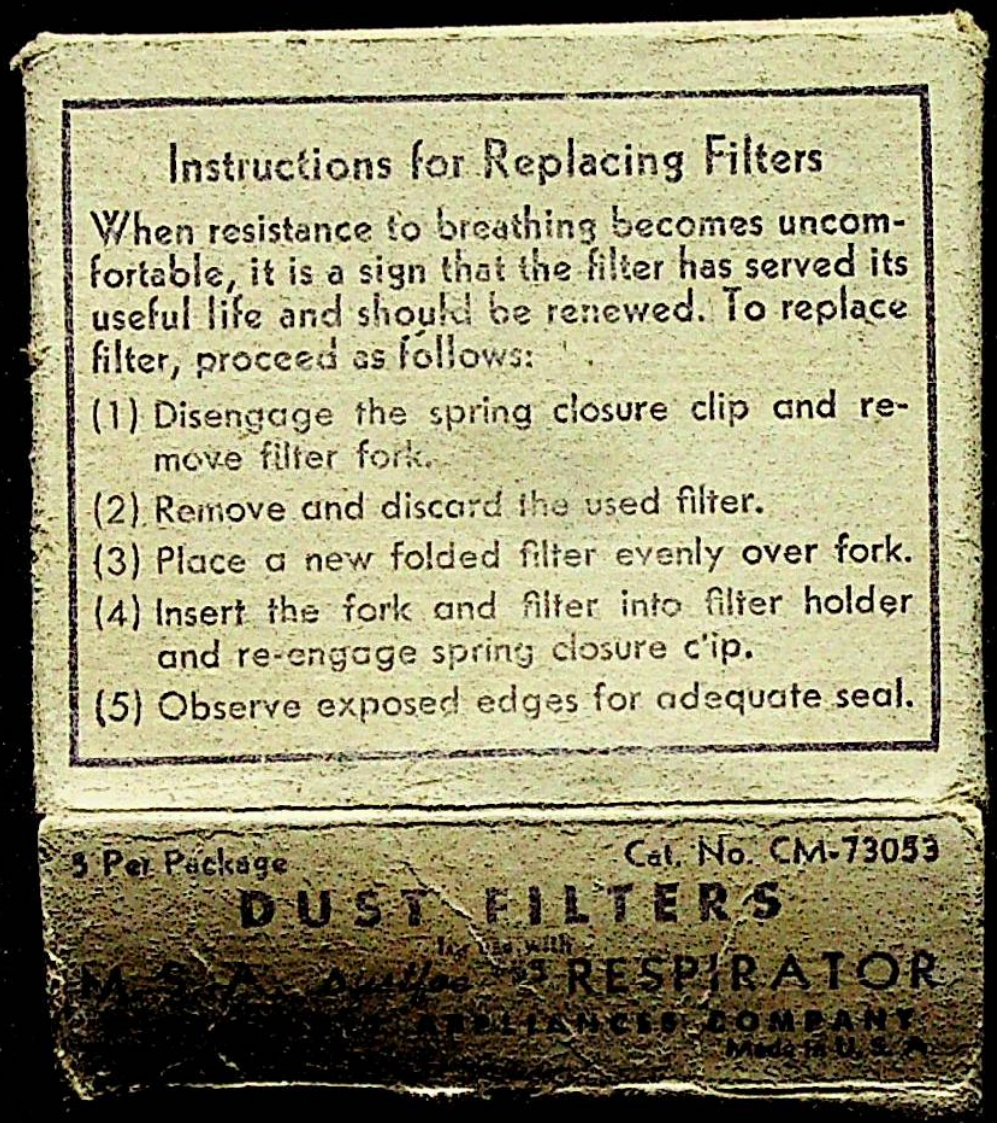
PERMISSIBLE RESPIRATOR FILTER FOR DUSTS
APPROVAL
NO. 2166
ISSUED TO THE
MINE SAFETY APPLIANCES CO., Pittsburgh, Pa., U.S.A.
Approved for protection against the inhalation of dusts that are not significantly more toxic than lead (dispersoids or particulate matter formed by the disintegration of solid materials by such processes as crushing, grinding and abrading).
Approved for assembly with BM-2166 facepiece.
CAUTION
This filter removes only dispersoids from the air. It gives no protection against gases, vapors, or an insufficiency of oxygen.

BM-2166



Instructions for Replacing Filters

When resistance to breathing becomes uncomfortable, it is a sign that the filter has served its useful life and should be renewed. To replace filter, proceed as follows:

(1) Disengage the spring closure clip and remove filter fork.

(2) Remove and discard the used filter.

(3) Place a new folded filter evenly over fork.

(4) Insert the fork and filter into filter holder and re-engage spring closure clip.

(5) Observe exposed edges for adequate seal.
